# Sreehari J R

*AI/ML Developer*
shnvklm2004@gmail.com — +91 8304935971 — LinkedIn (sreehari-j-r-1b9b991ba) — GitHub (SreehariNvklm) — Portfolio — Medium Blog (shnvklm2004)

## ABOUT ME

Passionate AI/ML Developer with a strong grasp of modern ML advancements. Evolved from web development and game development to AI/ML with special focus on NLP, LLMs, Computer Vision tasks, and deploying real-world AI solutions.

## SKILLS

**Machine Learning**
NLP, Computer Vision, Data Analysis, LLM Fine-Tuning, Gen AI, MLOps

**Frameworks**
TensorFlow, Flask, Streamlit, Pytest, OpenCV

**Tools**
Git, Firebase, MongoDB

**Languages**
Python, HTML/CSS

## EDUCATION

**SCT College of Engineering** *2022–2026*
BTech CSE (AI & ML), CGPA: 8.95

**Govt HSS Navaikulam** *–2022*
Higher Secondary, Score: 96.5%

## CERTIFICATES

**Python for Machine Learning & Data Science Masterclass**
Jose Portilla, Udemy — Python, Pandas, NLP

**FREE TensorFlow Keras Bootcamp**
OpenCV University

## PUBLICATIONS & BLOGS

**1. Multi-Modal Oral Cancer Detection Using Weighted Ensemble Convolutional Neural Networks (arXiv 2510.03878)**
The study aims to improve early detection of OSCC by developing a multimodal deep learning framework.

**2. From Images to 3D: Building Im3D — A Depth Estimation Based Point Cloud and Mesh Generator**
Blog on exploring the core technical know-how on image 3D reconstruction using monocular depth estimation.

## EXPERIENCE

**VoiceStack** *Jun 2026 - Till Now*
Engineer

- Held responsible for the development of an automated behavioral testing framework that saved nearly 50% of testing time.
- Worked closely with voice-agentic orchestration
- Gained experience with frameworks like pytest, pipecat and langgraph, etc.

**VoiceStack** *Mar-Jun 2026*
Intern

- Developed an automated testing framework to reduce the bottleneck of testing an AI agent system.

**DiceMed** *Mar-Jul 2025*
Machine Learning Research Intern

- Worked with computer vision based tasks, deep learning models.
- Developed CNN models on multi-modal usecases for increased accuracies upto 90% on medical conditions.
- Served as corresponding author on research paper.

**DEX AI Solutions** *Apr-Jul 2024*
Machine Learning Intern

- Worked with LLMs, prompt engineering, and neural networks.
- Developed chatbots and ML tools using modern tech stacks.

## PROJECTS

**GADVIN**
Prompt to ML/DL projects generator implemented using AI agents, coupled with interactive visual components.

**EMMA SEO Tool**
Webpage realtime SEO Analyzer with chatbot built using Gemini LLM, React frontend with Flask backend.

**VERDICT AI**
RAG-based search engine along with chatbot for open-sourced image case files with a good precision. Worked with OCR, RAG pipelines, etc.

## ACHIEVEMENTS

**Winner**
Allianz Tech Championship 2024

**Runners Up**
InnovateX, 2025 Hackathon by Digital University of Kerala
